To whom It my concern,I am a XM radio subscriber. I pay a monthly fee for this service.I think satellite is the best thing that ever happen to radio. It offers such a wide array of programming, commercial free as opposed to local stations. I thing it is ridiculous that the NAB wants to keep XM and other satellite radio networks from broadcasting traffic and weather reports. I respectfully request that you reject petition 40-160, and tell NAB to mind their own business!
